Everything You Wanted To Know About Renewable Energy Credits

November 18, 2004 12:00-2:00 Eastern Time

Agenda

Roger Feldman – Welcome and Introductions

Rick Saines – Introduction to RECs
Overview of current REC policies and issues

Mike Sloan – Experience in Texas
Review of the Renewable Portfolio Standard (“RPS”) in Texas and lessons learned regarding RECs

Roger Freeman – Experience in the North East
Review of the RPSs in the North East and discussion of regional REC trading issues

Tom Kerr – Trading RECs and Traditional Emission Credits
Review of the interplay between RECs and more traditional emission credits, such as SO₂ and NO_x credits.

Roger Ballentine– A look to the future
Discussion on the future federal renewable energy policy, including the fate of a federal RPS and whether RECs will play a role

David South– A look to the future
Discussion on the future of renewable energy policy at the state level, considering RPSs and REC trading

Questions and Answers – Please e-mail questions to Richard.M.Saines@BakerNet.com

You may begin to e-mail questions during the presentations.
